During the current fiscal year, the Japanese economy continued on its modest recovery trend, on the back of an improved employment situation in addition to the recovery in corporate earnings, while signs of delays in the recovery of consumer spending became evident, as import costs of consumer goods rose due to the weakening yen.

(5) Notes on Consolidated Financial Statements

(Notes on the Premise of Going Concern)

Not applicable.

(Significant Assumptions Underlying the Preparation of the Consolidated Financial Statements)

1. Matters concerning the scope of consolidation

(a) Consolidated subsidiaries	59 corporations
(Newly added this fiscal year)	1 corporations
(Eliminated this fiscal year)	3 corporations

(b) Nonconsolidated subsidiaries	8 corporations
----------------------------------	----------------

Because the non-consolidated subsidiaries are small in terms of their total assets, net sales, net income and retained earnings, they did not have material impact on the consolidated financial statements.

2. Matters concerning the application of the equity method

Corporations accounted for by the equity method

Non-consolidated subsidiaries	7 corporations
Affiliate corporations	29 corporations
(Eliminated this fiscal year)	1 corporations

The equity method was not applied to the investment made in a non-consolidated subsidiary and an affiliate corporation not subject to the equity method, since it did not have a material effect on the net income or retained earnings.

(Changes in accounting principles)

(Application of the Accounting Standard for Retirement Benefits, etc.)

Effective from the fiscal year under review, the Company has adopted the provisions set forth in the main clause of Section 35 of the Accounting Standard for Retirement Benefits (Accounting Standards Board of Japan (“ASBJ”) Statement No. 26, May 17, 2012, hereinafter “Accounting Standard for Retirement Benefits”) and the provisions set forth in the main clause of Section 67 of the Guidance on Accounting Standard for Retirement Benefits (ASBJ Guidance No. 25, March 26, 2015, hereinafter “Guidance on Retirement Benefits”). Accordingly, the Company has revised the method of calculating retirement benefit obligations and prior service costs and changed its method of attributing projected retirement benefits from the straight-line basis to the plan's benefit basis. Additionally, the Company has changed its method of determining the discount rate, from the method based on the number of years which approximate the average remaining years of service of the employees to the method in which a single weighted average discount rate is used that reflects the estimated timing of benefit payments and the amount of benefit payment for each estimated payment period.

The application of the Accounting Standard for Retirement Benefits, etc. is subject to the tentative treatment provided for in Section 37 of the Accounting Standard for Retirement Benefits. Consequently, the impact of the change in the method of calculating retirement benefit obligations and prior service costs has been recognized as increases or decreases to retained earnings as of the beginning of the current fiscal year.

As a result, retained earnings as of the beginning of the current fiscal year increased by 45 million yen. Meanwhile, the impact of this change on the profit or loss for current fiscal year is minimal.

(Changes in presentation methods)

“Provision of allowance for doubtful accounts” under “Non-operating expenses,” which had been presented separately in the previous fiscal year has been included in “Miscellaneous expenses” from the current fiscal year, as it accounts for less than ten percent of the total amount of non-operating expenses. The consolidated financial statements of the previous fiscal year have been restated in order to reflect this change in presentation.

As a result, “Provision of allowance for doubtful accounts” in the amount of 899 million yen and “Miscellaneous expenses” in the amount of 818 million yen, under “Non-operating expenses” in the consolidated income statements of the previous fiscal year have been restated as “Miscellaneous expenses” in the amount of 1,718 million yen.

(Revision of the amounts of deferred tax assets and deferred tax liabilities due to the change in corporate income tax rate)

Following the promulgation of the “Act for Partial Revision of the Income Tax Act, etc.” and the “Act for the Partial Revision of the Local Tax Act, etc.” on March 31, 2015, the statutory effective tax rate used in the calculation of deferred tax assets and deferred tax liabilities for the fiscal year ended March 31, 2015 (However, limited to those that are expected to be reversed on and after April 1, 2015) has been changed from the 34.62% of the previous fiscal year to 32.11% for those expected to be collected or paid during the period from April 1, 2015 to March 31, 2016, and to 31.33% for those expected to be collected or paid on and after April 1, 2016.

As a result of these changes, deferred tax assets (net of deferred tax liabilities) decreased by 27 million yen, income taxes – deferred recorded in the current fiscal year, valuation difference on available-for-sale securities, deferred gains or losses on hedges and remeasurements of defined benefit plans increased by 588 million yen, 490 million yen, 9 million yen and 60 million, respectively.
