

# Supplemental Document for 3<sup>rd</sup> Quarter of Fiscal Year 2016

---

February 3, 2017  
Nippon Suisan Kaisha, Ltd.

## ◆ Revised up annual forecast

In addition to the recovery of Salmon/Trout market price, domestic Marine Products and Food Products Business went strong due to a strong yen and an advantage in price of major raw materials. Despite a decrease in sales revenue by foreign exchange movement, operating income increased approximately 8% from the previous year. Since this trend has been continuing in 4<sup>th</sup> quarter, we have revised up annual forecast.

## ◆ Net Profit is expected to be record-high three years in a row

During consolidated cumulative 3<sup>rd</sup> quarter, drastic recovery of Salmon/Trout market price in Marine Products Business and strong sales and lower costs of imported materials in Food Products Business resulted in a more than expected increase in profit. Therefore, we have revised up annual forecast on November 4, 2016. On a full year basis, it is expected that operating income exceeds that of previous year and ordinary income posts record-high. In addition, net profit is expected to be record-high three years in a row.

3Q of FY2015	Overseas		Domestic	Overseas	Domestic		3Q of FY2016
	<North America>	<Europe>	<Fine Chemicals>	<South America>	<Marine>	<Food>	
	Marine : Decrease in Pollock roe production, weak fillet market Food : Struggle in frozen food business for retail due to tougher competition	Increase in raw material costs due to weaker Euro	Decrease in production of medical materials and increase in selling cost	Recovery of Salmon/Trout market price and increase in the value of the fish in the pond covered the loss of toxic tide	Nissui non-consolidated secured the profit in various species including shrimp. Domestic fishing kept strong.	Nissui non-consolidated kept strong in frozen food for retail and food service. Chilled business kept strong as well.	

# Comparison of Net Sales by Segment Matrix (Y-on-Y)

◆ Decrease in sales revenue due to slumps in North American Marine and Food Products Business and negative foreign exchange effect.

Operating Income (Bar Chart)

### Main Causes of Fluctuations

#### <Processing>(Revenue decreased but income increased)

- North America  
Retail ; Not able to cover significant decrease in sales and profit in the 1<sup>st</sup> quarter due to slow sales of key products
- Food Service : Income increased as price of shrimp (raw material) is keeping low price.

- Europe  
Income decreased due to weak Euro while sales volume increased
- Japan  
Sales of frozen foods for retail and frozen food for food services were strong, in addition to cost reduction such as decrease in import cost because of strong yen which resulted in keeping revenue and income increased.

#### <Chilled Business>(Both revenue and income increased)

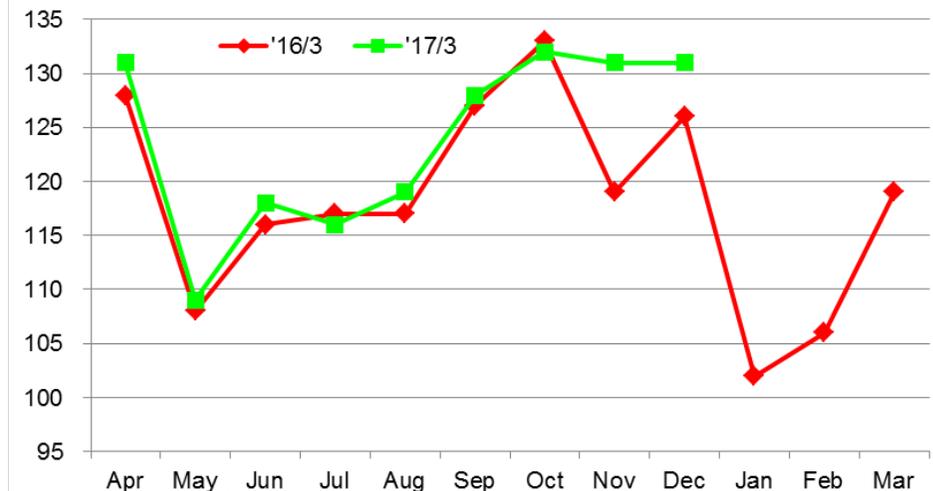

- Increase both in sales and profit thanks to strong sales of salads and deli foods to convenience store.

- Each graph (excluding Non-consolidated and Consolidated adjustment) shows the total of consolidated subsidiaries.
- The Italic figures in the lower part of this chart shows the accumulation of the bar (operating income).
- Consolidated Adjustment of operating income includes the amortization of goodwill and unrealized income in inventory.
