

Nissui Group

the Survey of Procured Marine Resources Sustainability

September 28,2018
Nippon Suisan Kaisha, Ltd.

All the marine products procured by the Nissui Group is confirmed to be from sustainable marine resources in 2030.

Marine resources · Sustainability WG:Research of our procured resources ONISSUI

Target Companies: Nissui and its group companies (28 domestic, 16 overseas)

Target Period : Procurement in 2016

Research items : Species (Scientific name), Catching area (FAO fishing zone),

Country of origin, Weight (Green weight base)

Procured Volume : app. 1.6 million ton (Green weight base)

→ equivalent to 1.6% of World total Catch

Wild

93%

To be re-checked by

Fishing control organization (National, Local)

> Verified by **FAO**

Species : app. 450 species

Catching areas : 18 FAO fishing zones

Country of origin : app. 80 countries

Proportion of Wild and Farmed: Wild 93%

> 7% Farmed

Check the status of each resource procured

Verified by Step 1 Step 3 Step 4 Step 2 **FISHSOURCE** Certified **FAO Fishing control FISHSOURCE Endangered** organizations Endangered sp.

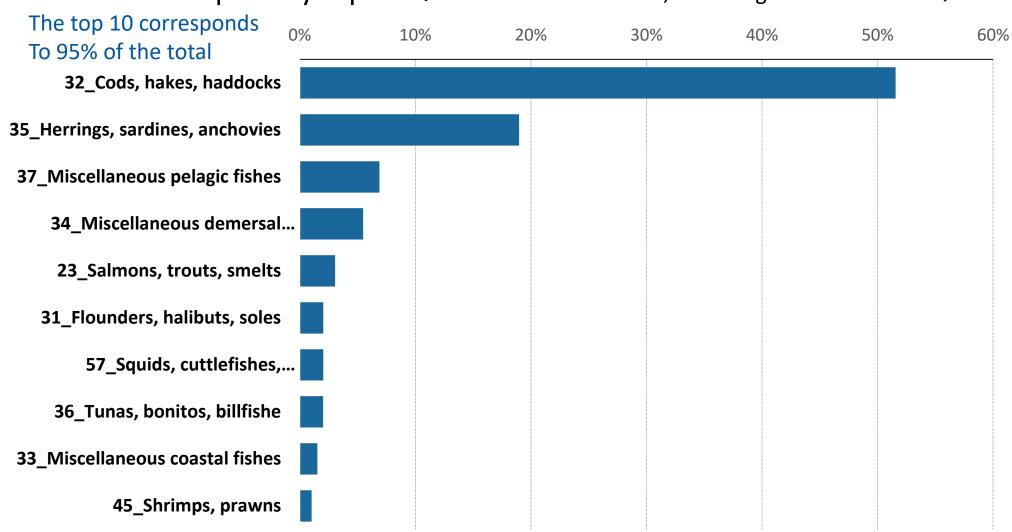

Certified

resource

Procured Marine Resources of Nissui Groupe in 2016

Procurement quantity top 10 (FAO - ISSCAAP Wild fish, excluding fish oil \cdot fish meal)

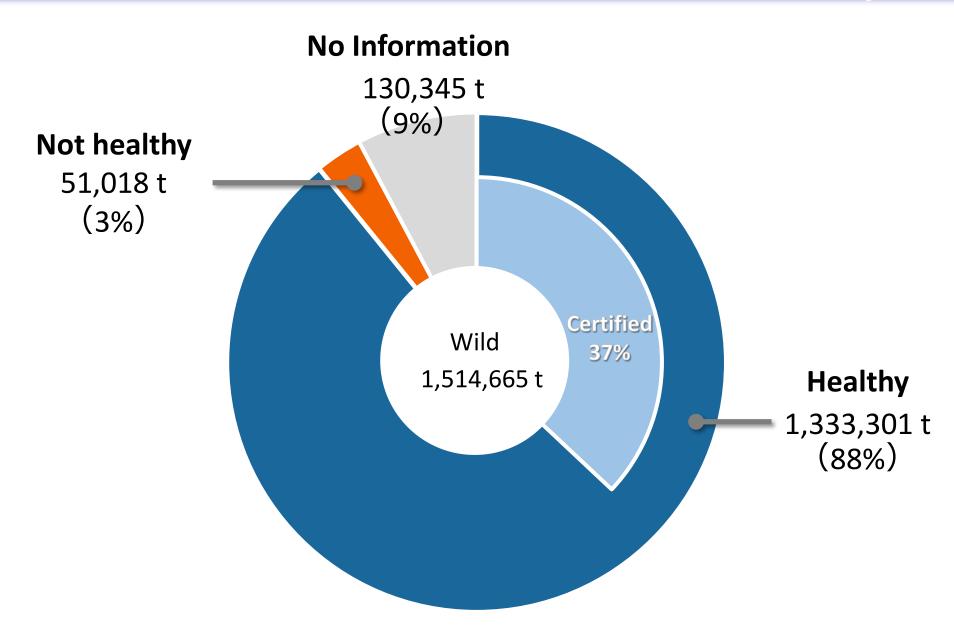

*34: Atlantic Redfish, Cutlass, White Warehou, Wahoo, Ling, Orange Roughy, and so on

*37: Mackerel, Yellowtail, Horse Mackerel, and so on

Evaluation of our procured wild resources

Certified Marine Resources of our procurement

Certified Wild Marine Resources of our procurement

Wild/Farmed	Certification	ISSCAAP Code	% of Certified	
Wild	Dolphin Friendly, FAD free	36_Tunas, Bonitos, Billfishes		
	MSC	32_Cods, Hakes, Haddocks		
		35_Herrings, Sardines		
		34_Other bottom fish		
		31_Hounders, Halibuts, Soles		
		23_Salmons, Trouts		
		45_Shrimps, Prowns	37% of	
		55_Scallops	Wild caught fish	
		37_Other pelagics	(MSC:36%)	
		43_Lobsters, Spiny-rock lobsters		
		56_Clams, Cockles, Arkshells		
		54_Mussels		
		Other products		
	RFM	42_Crabs		
		44_Squat-lobsters		
	Total certified wild caught fish		558,945	

^{*} In general certified wild caught volume is 12.5% of total wild caught fish in the world in 2017.

Evaluation of wild resource (Endangered species)

Critically endangered (CR) in IUCN, "Quasi-Extinct" in WWF, "Endangered species IA", "Endangered species" and "Endangered species IB" in the ministry of Environment.

(Weight: ton)

Handling Area	Red List evaluation	Species (Scientific name)	Weigh	Evaluation	Remarks
Japan	CR	Southern Bluefin Tuna (Thunnus maccoyii)	114	Not healthy	Exist Resource Recovery Plan
	EN	Sea cucumber(Apostichopus japonicus)	20	Not healthy	Exist Resource Control Plan
Denmark	CR	EEL (Anguilla anguilla)	0.4	Not healthy	ESF related procurement
	EN	HALIBUT WHITE (Hippoglossus hippogloss)	9	Not healthy	To be reconsidered
	EN	SKATE (Leucoraja Ocellata)	115	Not healthy	US east coast fisheries regulation applied

Policy in Japan

Southern Bluefin Tuna

Commission for the Conservation of Southern Bluefin Tuna decides TAC and assignment volume of each contracted country based on scientific researches. Japan will continue import under instruction of the Fisheries Agency.

Sea cucumber

Each prefecture controls its resource (fishing season, size regulation, releasing larvae, fishing ground construction, etc.) and current catching volume will be maintained. However if the resource condition goes worse, catching volume will be reduced or suspended.

Policy in Denmark

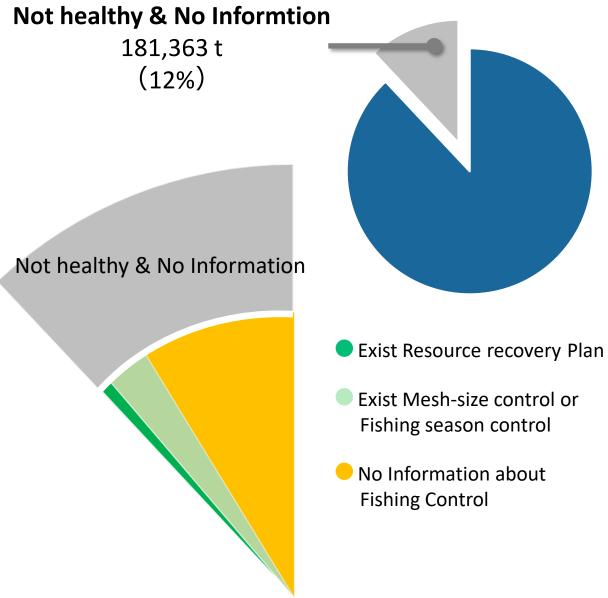

Endangered species are not allowed to be procured. Only the endangered species with appropriate resource management program are to be procured by customers' request.

Evaluation of our procured wild resources (Not healthy, No Information) in terms of Fishing control

Evaluation of primary species

	-		
Country of origin	Species		
Unknown	Fish Meal, Fish Oil		
China	Cutlass fish		
India	Cutlass fish		
Ecuador	Anchovy		
Thailand	Sardine		
Argentina	HAKE		
Thailand	Lizard fish		
Peru	Anchovy		
Taiwan	Big-eye tuna, Yellowfin tuna		
China	HADDOCK		
Ecuador	SHRIMP		
China	Atlantic Cod		
Taiwan	Big-eye tuna		
Thailand	Golden threadfin bream		
Vet Nam	Shrimp		
Thailand	Japanese saedinella		
India	Lizard fish		
China	Auxis		
Taiwan	Swordfish		
India	Bensasi goatfish		
Namibia	Hake Capensis		
USA	Atka Mackerel

Next Goal and Action Plans

Next Goal-1

Focusing on the procured resources that we couldn't confirm their resource recovery plan, Mesh-size control or Fishing season control.

Action Plan-1

- Keeping an eye on the latest information on each resource by way of rechecking its resource recovery plan and fishing regulation.
- Proposing through SeaBOS that Fishing countries should carry out resource control with scientific base.
- Keeping an eye on the policy of Fishing countries (especially about against IUU fishing and Modern slavery).
- Co-operating with GDST(Global Dialogue on Seafood Traceability).

Next Goal-2

Trying to disclose traceability status of Fish Meal and Fish Oil which are raw materials of fish feed.

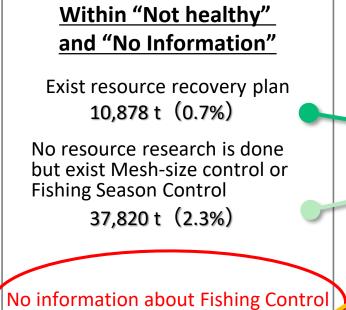

Action Plan-2

• With the cooperation of advanced blended feed makers, we will take countermeasures by learning about their initiatives.

Evaluation of our procured wild resources

Aim to reduce to zero by 2030

132,666 t (8.8%)
